

Emiliana

ORGANIC & BIODYNAMIC VINEYARDS

Emiliana launches its new **official web site**

[The Excellence of Nature]

...

...

April 2010. Emiliana has launched a new web page to deliver a wide range of information on its projects, philosophy, the sustainable agricultural practices used in its vineyards, and a complete presentation of its ample portfolio of biodynamic and organic wines, recognized world-wide for their high quality.

The attractive and innovative design of the new Emiliana website is very much in line with the winery's overall concept and identity and improves its communications with its customers and consumers. This interactive page provides information simply and attractively to help users to understand the key elements of organic and biodynamic agriculture and the importance of each in making quality wines.

The essence of Emiliana's work can be explained in a single word: excellence. And this dedication to excellence is reflected in the winery's respect for the natural harmony of the Earth. It considers the vineyard to be a living resource that must be cared for, and doing so results in the maximum expression of terroir in its wines.

The website also provides information on Emiliana's social accountability projects, its products, awards, and major news as a means of responding to its commitment to its consumers and community.

We invite you to visit Emiliana through our new web site and join our Facebook group "Emiliana Organic & Biodynamic Vineyards."
